

NOT JUST A PHOTO

Wedding photos do not need to be boring. It is my life's mission to show couples that their wedding photos can be an exciting display of moments that beautifully reflect the artistry, effort and love they put into their day. The wedding day goes by so fast, and I am here to keep some of those moments forever. Whether it's the tear-filled vows, hilarious speeches or the candle-lit first dance that makes the whole party melt into a puddle of happiness, I want to be the one to capture it.

My favourite thing to hear from couples when they get their photos back, is "oh, I forgot about that moment, I am so glad you took a photo of it!", or "I didn't realise you took a photo of that, thank you!".

IT'S ALL IN THE *DETAILS*

Take the rings, for example. These rings represent forever. Today will be the first time you wear them, and then for the rest of your life. Photographing the seemingly small things like rings, flowers and place cards is equally important to me as the first kiss, portraits and first dance.

Trust me with the big and small moments on your day. I've got this.

ANALOGUE IS BACK

I waited years for the day when analogue photos would make a comeback.

I offer packages with film & digital, and you can decide which one I should put more of a focus on. The beauty of film is that you never quite know what you're getting, meaning you can't expect perfect photos. But there is so much beauty in the imperfection,. Give me all the blurriness and light leaks, please!

YOUR WISH *IS MY* COMMAND

Your day is about YOU.

There is no point in me taking photos that you're not comfortable with. So, if you want to do something completely whacky, or if you don't want to do any of the traditional portraits, then we won't! I want you to feel like you can be yourselves, and just focus on one another.

If you hate posing, we don't have to do any proper posing. Trust me, just taking a walk down the street as a newlywed couple will be enough for me to get the gorgeous shots I need, and which you will treasure forever.

Stiff isn't a part of my vocabulary. We want fun, energetic, photos which display the vibe that comes with a wedding.

WHAT CAN YOU EXPECT FROM ME ?

Firstly, enthusiasm. I am a huge fan of weddings and love, so it truly is a dream come true to photograph weddings. I adore meeting your families, being a part of your history for a day. You can choose from a variety of packages, or we can tailor something specific to your needs. You can book me from 3 hours, and up to an entire weekend. I am available across Germany and the world (seriously, buy me the ticket and I'll be there).

I always come prepared with multiple cards so your photos are safe in a backup, and a backup camera is on me incase anything happens to the main camera. You will get a selection of edited photos within one week after the wedding so you can enjoy your memories on your honeymoon, and within 5 weeks after your wedding, you'll receive a personal gallery with all your photos available for download.

I will be there for you, before your day, during your day and after your day. It's my greatest joy to do this job, and I can't wait to photograph your wedding.
